Summary

Product designer with 7 years of experience building and scaling digital products from 0 to 10x. I work across the product lifecycle - from research and strategy to execution - partnering with cross-functional teams to solve complex user problems. My strength lies in turning ambiguity into clear, intuitive experiences that create measurable business impact.

Work Experience

Editor / Acquisition - Activation, *PocketFM* 01/2026 – Present
India

- **Process Optimisation:** Voluntarily audited and streamlined a broken writer-support workflow during a major system migration, mapping out comprehensive workflows to address root-cause product glitches.
- **Crisis Management:** Successfully managed a critical 400% surge in platform queries (averaging 80–100 daily tickets) during a major system update, ensuring continuous communication between users and technical teams.
- **Strategic Workflow Design:** Proactively engineered a scalable automation workflow integrated with AI APIs (Anthropic/Claude) to instantly resolve 200+ concurrent platform queries, strategically targeting a backlog reduction from 450+ to under 100 tickets.
- **Technical Initiative:** Audited system vulnerabilities during a massive July glitch, initiated the procurement of API infrastructure, and mapped out technical routing pipelines to connect engineering, payment, and dashboard systems.
- **Root-Cause Analysis:** Utilized Freshdesk behavioral data to identify recurring user pain points, reporting system vulnerabilities directly back to product stakeholders to improve future UI/UX updates.

Product Designer II, *Shiprocket* 10/2024 – 01/2026
Gurugram

- **Scalable Growth Architecture:** Envisioned the omni-channel communication by designing native workflows targeted towards SMBs and enterprise users, linearising the flow to increase the DAU to ~50,000 from ~10,000.
- **Cross-Functional Product Strategy:** Ideated and led the implementation for automated configuration of marketing campaigns for business owners using market research, data analysis, and custom business rules; collaborated across Product, Tech, Data, and Operations teams to power a core company revenue line and accelerate seller-buyer sales lifecycle.
- **Conversational Commerce Innovation:** Ideated and guided engineering execution for the first scalable smart-chatbox automation workflow across **WhatsApp** and **Instagram**, driving a 45% increase in buyer-seller interactions and boosting intent-to-buy conversions by 20% in the first quarter.
- **B2C Product Leadership:** Co-led the design and product experience for *My Shiprocket*, the platform's premier B2C tracking and product discovery mobile application, yielding a 35% user engagement uplift within three months post-launch.
- **End-to-End Product Ownership:** Co-owned, comprehensive design lifecycle for *Shiprocket Quick*, a localized hyperlocal logistics platform managing 5,000+ daily intra-city deliveries across the Delhi-NCR market for D2C merchants and SMBs.

- **User Research & Data Synthesis:** Mapped entire merchant user journeys by conducting over 30 qualitative user interviews and analyzing a database of 1,200+ customer support tickets to identify and systematically resolve friction points in order booking and delivery exception handling.

Product Designer I, *Leegality* 07/2021 – 04/2024
Gurugram

- **Enterprise Dashboard Architecture:** Redesigned Leegality's legacy dashboard, replacing a cluttered, non-scalable interface with a streamlined, modular system actively utilized by 500+ top-tier enterprises, including HDFC Bank and Federal Bank.
- **Data-Driven User Research:** Anchored critical product decisions through rigorous data synthesis, analyzing over 150 Maze session recordings, thermal heatmaps, and 20+ qualitative user interviews to introduce intuitive 'Create' actions, contextual menus, and customizable tables across complex document workflows.
- **Product Performance Metrics:** Delivered a 25% boost in Customer Satisfaction (CSAT) scores and scaled Daily Active Users (DAUs) from 10K to 80K within 6 months, significantly increasing platform stickiness while slashing average user time-to-action by 40%.
- **AI Product Innovation & Compliance:** Designed and pioneered Leegality's AI-powered Face Match biometric feature, enhancing digital identity verification by matching live facial captures with official ID documents to achieve a 40% reduction in fraudulent signing attempts for BFSI clients. [1]
- **Self-Serve Product Transformation:** Strategically designed and launched Leegality's self-serve eSign credit purchase ecosystem, converting a heavy, manual, customer-support-dependent transaction into a completely user-owned commercial flow.
- **Business Operations & Revenue Scaling:** Integrated real-time account balances, audit logs, and purchase flexibility into the eSign flow—yielding a 47% surge in paid subscriptions, achieving 100% enterprise adoption within 3 months, and dropping customer support dependency by 60%.

Product Designer, *INFS* 11/2020 – 05/2021
Pune

Curated the content and designed the product dashboard for fitness enthusiasts across multiple boards, ensuring alignment with digital-first learning experiences and **optimising curriculum delivery for web and mobile platforms**.

Product Associate, *Vedantu* 05/2019 – 10/2020

- Curated and structured academic syllabi for **K-12 students across multiple boards**, ensuring alignment with digital-first learning experiences and optimizing **curriculum delivery for web and mobile platforms.**
- Collaborated with product and content teams to design **student learning journeys within the app**, sharpening early understanding of user flows, engagement metrics, and interactive UX patterns.

Educational Experience

Master of Science, Botany, *Jamia Hamdard University* 06/2015 – 07/2017

Majored in microbotany, trained in scientific inquiry, hypothesis testing and qualitative / quantitative observation.

Toolkit

Design Tools
Figma, FigJam, XD

Design Methods
Design Thinking, Jobs-to-be-Done, User Journey Mapping, Ideation, Wireframing, Design System, Interaction Mapping

AI & Automation
Claude, Figma AI, GPTs

UX Research
Maze, Google Analytics, FreshDesk

UI Skills
Responsive Design, Component Libraries, Accessibility, Microcopy, Atomic Design

Collaboration
Jira, Slack, Confluence, Zoho

Side Projects

Published Mangaka – Created and illustrated original manga, focusing on visual narrative, character arcs, and layout design. Still running on Mangaplus.
